Practical Class #0

Our goals

- Security in electronic mail (PGP)
- PKI with OpenSSL
- VPN with OpenVPN
- Firewalls (packet filters, application-layer firewalls)
- Programming and security
- Security auditing (application-layer, remote and local auditing)
- Wireless network security
- Intrusion detection and prevention
- Web application security

Reference operating system: Linux CentOS 7

Evaluation

Lab projects: 12 in 20 points (practical component)

- Minimum of 40% on the overall projects
- Three (3) projects in groups of 2 (mandatory)
- Projects with defense (mandatory)

Planning (Labs & Projects)

06-Feb-23	Electronic mail security using PGP
